DETAILED ACTION

1. Claims 1-11 are allowed.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The prior art of record discloses enabling a user to input identifying information about himself and then be guided to find personal information regarding himself in various external databases and upon authorization of the database owner, the user may be granted access to the particular database. With respect to claim 1, the closest prior art of record does not explicitly disclose querying or modification of said core person data and imposes said business rules when an attempt is made to input, query or modify said core person data, thereby controlling access to the person data repository from any of the plurality of unrelated database systems in light of other features disclosed in independent claim 1. With respect to independent claim 10, the closest prior art of record does not explicitly disclose providing a person data repository for all persons requiring visibility in any of the plurality of unrelated database systems and applying the business rules of the access control module to restrict the input of the new person data into the plurality of databases if the new person data matches person data already existing in the plurality of databases in light of other features disclosed in independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
